

INSOLES AND COUNTERS RECYCLED & RECYCLABLE

A thermo-ecological compound, also laminated in E.V.A, for the manufacture of insole and footwear buttress, produced with innovative and sustainable technology

RESTRICTED SUBSTANCES FREE

ADVANTAGES OF USING TUBOX

01

RECYCLABLE MATERIAL

Plastic sheet made from hard-to-recycle composite materials for the footwear industry

02

WATERPROOF

It has a great advantage over cellulose insoles, it is durable, waterproof and does not crumble. Making the shoe much more resistant.

03

MOLDABLE THERMAL

Very resistant with a high degree of molding.

04

SMELESS

Even made from recyclable products has no smell.

05

ECONOMIC

Cost-effective compared to cardboard and resin and reduce workforce and final cost of the resulting products.

06

ACCEPTS STAMPS

In this way the customer can put his own identifications.

07

REVERSE LOGISTICS

One of the biggest concerns of the Magma group is its commitment to the environment, for this reason, since the beginning of activities, the company seeks to minimize waste and environmental impact through the recycling of all plastic packaging produced by the Magma group factories and stores and the reverse logistics of our clients, as well as recycling waste from other industries.

Sustainable for the pocket and for environment.

We have many kinds of dubging and thickness.
